INTRODUCTION

The development of a Control State Coding System was a project under consideration for many years. The coding system was inaugurated by NABCA Chairman, Kenneth F. Wynn (1985-1986) because he felt it time to make a concerted effort to implement a program that would benefit both Control States and Vendors alike. Such benefits would include:

centralized and reduced inventories

shorter lead times for orders

more efficient, cost effective warehousing

more accurate sales and depletion data

After much compromise and with the cooperation of the 19* control jurisdictions, a coding system was designed.

The Control State Code (CSC) is a unique number identifying alcoholic beverage BRANDS and SIZES sold in the Control States. Distilled spirits and fortified wines are assigned a four to five-digit code, while six-digit codes for all other wines begin with varying numbers that are determined by type. In addition to the unique four to six-digit code, each product has a three-digit prefix to identify its class and a two-digit suffix to identify its size. VAP, Gift packs and Special Packaging codes can vary from two to four-digit code. The established structures will be used to code the beverage alcohol products.

It is extremely important that you read and fully understand this specification manual. If you have any questions with any of the material covered herein, please contact Derrick Rollerson (Derrick.Rollerson@nabca.org) or Gina Rirksuranarong (Gina.Rirksuranarong@nabca.org) in the NABCA CSC/Statistical Department at (703) 578-4200

****Please note:*** As of June 2012, Washington State is no longer a control system. There are now 18 control jurisdictions.

CONTROL STATE CODE
USE OF CONTROL STATES CODE

As of August 2018

<u>STATE</u>	<u>USING</u>
Alabama	No
Idaho.....	Yes
Iowa	Yes
Maine	Yes
Montgomery County, MD.....	No
Michigan.....	No
Mississippi	Yes
Montana	Yes
New Hampshire.....	No
North Carolina	No
Ohio	No
Oregon.....	No
Pennsylvania	No
Utah	Yes
Vermont.....	Yes
Virginia.....	Yes
West Virginia.....	No
Wyoming.....	Yes

Please Note: The states that are not using the Control States Code are currently using their own coding structure and should not require a CSC number.

SYSTEM SPECIFICATIONS

1. **ANY PRODUCT LISTED IN A CONTROL STATE USING THE CONTROL STATE CODING SYSTEM MUST BE ASSIGNED A CONTROL STATE CODE NUMBER (CSC).** This number is to be assigned by the NABCA. A block of numbers has been set aside for the Control States' use to handle exceptions such as special orders, specialty items and boutique wines. However, we strongly encourage Control States and Suppliers to use the regular coding structure in all circumstances.
2. **AGE AND/OR PROOF DIFFERENCES/CHANGES.** Products bearing the same name, but with varying ages and/or proofs will require different codes if the products are distinctly different. The products are considered to be essentially the same with ages of 41 and 42 months. If a product's age and/or proof changes and it is national in scope, a new code number will not be necessary.
3. **PACKAGING DIFFERENCES/CHANGES.** Products bearing the same name and size yet packaged differently will require different codes, (i.e. Christmas wraps).
4. **VENDOR DIFFERENCES/CHANGES.** For products bearing the same name but having different vendors the national supplier will be listed as the 'Vendor of Record'. If the vendors are parent and subsidiary, new numbers will not be assigned. If a product's vendor changes and it is national in scope, new code numbers will not be required, and will transfer to the new vendor upon notification and authorization from the vendor.
5. **NAME DIFFERENCES/CHANGES.** Products that are the same but with different names will require different codes. If the product's name changes and is national in scope, a new code number will NOT be required.
6. **VINTAGE WINES.** A CSC number will be assigned for the product without referencing the vintage. If a Control State or Supplier wishes to obtain separate numbers for different vintage years, NABCA will assign those codes.
7. **GTIN CHANGES.** A new CSC number will NOT be assigned for products with changing GTIN numbers. However, it is extremely important to notify the NABCA of any changing GTIN numbers, so we may update and keep current the CSC database.

Please Note: the NABCA should be notified of all changes to existing products carrying a CSC number, although most changes will not dictate a new CSC number.

A copy of the product label, OR a copy of Federal label approval is required for all NEW products you apply for. Size extensions of products already listed will not need either.

ASSIGNMENT PROCEDURES

OBTAINING A CONTROL STATE CODE (CSC)

A Control State Code (CSC) application form must be filled out and emailed (Derrick.Rollerson@nabca.org), mailed or faxed to NABCA before any code requests will be processed (NABCA will supply the application forms). It is extremely important that the application forms are fully completed out and that the class and type table supplied herein (pages 17 - 22) is used correctly. Once received, the NABCA will assign the code number(s) and send a copy of the form back to the respective vendors.

HANDLING CHANGES AND/OR DELETIONS

It is crucial that all vendors inform the NABCA of ALL changes (corrections/deletions) to products currently assigned a code number to avoid any confusion. This includes any changes to UPC/SCC numbers, pack sizes, appellation, etc. Effective December 2012, the NABCA has a 5-year time frame for discontinued codes but they will not be deleted from our system or reused. Discontinued codes can be reactivated at supplier's request.

NON-MEMBERS

If Control State Code applications are faxed to the NABCA, a copy of your company check must be faxed along with the application. See page 23 for costs of codes.

***Please Note:** Certain circumstances will allow the NABCA to delete and reassign a number prior to the five-year date providing the number has already been discontinued by supplier.*

COSTS

THE COST OF A CONTROL STATE CODE

In order to defray expenses incurred by the NABCA in implementing, assigning and maintaining the Control State Coding system, it is necessary to charge for each assigned code.

For non-members, the charge for each new code is \$72.00. Non-members must include a check with application(s) prior to codes being processed and released. For members of NABCA, the charge is covered by annual dues.

Please Note: It is strongly recommended that suppliers periodically review their list of codes registered with the NABCA for the purpose of corrections to existing codes, or to discontinue codes not being produced, or listed, any longer. To receive a current listing of Control State Codes, please contact Ann Saekoo or Derrick Rollerson (CShelp@nacba.org) at (703) 578-4200.

CASE CODE LABEL

The uniformity of the Case Code Label is certainly one of the major benefits to the Control State Coding System. Following is an example and explanation of the approved case code label:

1. **BACARDI LIMÓN 750 ML. 70 PROOF** **NH-4247**

2. **320 43136 75** **AL-A1044**

OR-470B MI-38347

4.  **WV-2414 OH-412B**

PA-7676 NC-47799

3.

- A. Actual size of the Case Code Label is 4"x6"
- B. Case Code Labels should be on white stock paper with black lettering unless approved otherwise.

CASE CODE LABEL INSTRUCTIONS

(For example only. The NABCA does not govern how labels are designed)

1. PRODUCT DESCRIPTION:

The size must be included.

2. CONTROL STATE CODE NUMBER:

“320” represents the three-digit prefix to further identify class and type. “43136” is the unique six-digit CSC number (Note: All leading zeros should be omitted). “75” represents the two-digit suffix identifying the size. The Control State Code number should be 7/8” to 1” high. The prefix and suffix number should be ¼” to ½” high.

3. OTHER STATE CODE NUMBERS:

Pennsylvania and North Carolina Code numbers should be 7/8” to 1” high. All other State Code numbers should be 1/2” high.

4. GTIN SYMBOLOGY:

The GTIN Bottle Symbology should be located in the lower left-hand corner of the case code label.

5. LOCATION:

The label should be located on an end panel.

Please note: For information regarding the Shipping Container Code (SCC), please contact GS1 US at:
